AT PATIO DRUMMOND, WE'RE ALWAYS STRIVING TO DO BETTER. AND THIS YEAR, WE ARE MORE THAN PROUD TO PRESENT TO YOU THESE 4 INNOVATIONS.

HYDRAPEL

Admixture that is incorporated directly into the mix of all our drycast products. With Hydrapel, concrete absorbs less water, which increases its resistance to freezing and thawing.

Hydrapel protects the products from stains and reinforces the resistance to UV rays for a vibrant and long-lasting color.

BELVEDERE

Structural concrete slab reinforced with fiberglass rebars. The Belvedere patio slab is installed directly on the wood structure of your deck with construction adhesive.

Say goodbye to sanding, painting or staining every 2-3 years!

Install it in 3 easy steps:

1. Measure
2. Glue
3. Lay down

Scan the QR code to learn more!

MAXI-BASE

Hybrid between the screw pile and the deck block. It is an adjustable surface base. The Maxi-Base can be used to raise: small patio, porch, balcony, stairs, shed and temporary structure.

The Maxi-Base's wide base ensures maximum stability for your project. The adjustable head offers 7" of adjustment to level your structure easily.

TO START
ON A SOLID
FOUNDATION!

THE ACHIEVEMENT
WE ARE MOST
PROUD OF!

CARBICRETE

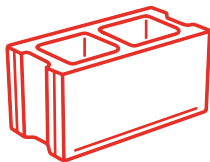

The reliable concrete you know, with a negative carbon footprint.

Cinder blocks made with CarbiCrete technology do not contain cement. They are made from an industrial by-product and are cured with CO₂ in a specially designed curing chamber. And by the way, we are the first in the world to make carbon-negative blocks.

This process reduces the amount of emissions associated with cement production by 2kg and permanently eliminates 1kg of CO₂ per block manufactured.

Scan the QR code to see how to use the surface base.
